About Me

I am a junior fullstack engineer who values honest self-assessment and learning by building. This helps me grow quickly, ask for help early, and give realistic progress updates on real tasks. As part of the Faculty phase of my RevoU program, I am building LearnBridge, a fullstack web application that helps teachers create learning materials and questions anytime, from anywhere. I have implemented automatic grading for multiple-choice questions, so teachers can see results immediately and follow each student's progress. Before moving into tech, I worked in a coffee shop packaging orders, which taught me attention to detail. Through building LearnBridge, I developed technical skills in responsive, mobile-first frontend interfaces with Next.js, TypeScript, and Tailwind CSS, plus REST APIs with NestJS and Prisma ORM, testing endpoints in Postman. With hands-on experience building a fullstack application and a habit of learning by doing, I am ready to contribute to a team and grow quickly through real-world work

Education

RevoU **Feb 2026 - Sep 2026**
Completed, Backend software Engineer

Sarjanawiyata Tamansiswa University of Yogyakarta **Jul 2016 - Oct 2021**
Bachelor of English Education, Education | GPA: 3.01

Working Experiences

Warehouse | J & T **Mar 2023 - Jul 2024**

- Unloaded goods from containers, scanned and verified every item against incoming data to maintain consumer trust and keep customers using J&T's shipping services.

Warehouse | Space Roastery **Jan 2022 - Dec 2022**

- Processed approximately 120 coffee orders per day by weighing, cleaning, sorting, and packing beans against customer specifications and routing requirements, ensuring consistent flavor and on-time distribution to protect brand reputation.

English Teacher Intern at SMP N 2 Sewon, Bantul, Yogyakarta | Sarjanawiyata Tamansiswa University of YogyakartaMar 2019 - Jul 2019

- Delivered classroom teaching aligned with the established curriculum by tracking student attendance, preparing learning materials, assigning in-class tasks, and evaluating progress to ensure students met weekly learning objectives.

Skills

Languages: JavaScript, TypeScript, HTML, CSS
Frontend: React.js, Next.js, Tailwind CSS
Backend: Node.js, NestJS, REST API, JWT Authentication
Database & ORM: PostgreSQL, Prisma ORM
Testing & API: Jest, Postman
Version Control & Development Tools: Git, GitHub, VS Code, Sublime Text
AI-Assisted Development: Claude, Gemini, Cursor, Antigravity
Soft Skills: Problem-Solving, Teamwork, Adaptability, Time Management
Hard Skills: REST API Development, Database Modeling, Authentication & Authorization, Responsive Web Design, Unit Testing
